

FloJak will easily deliver water for your family with 10 to 15 minutes of daily pumping.

Cool, clear water that is filtered by the earth, the way God intended, pumped into a container or through an outdoor faucet directly into your home for washing or flushing! FloJak is reliable, affordable, easy to install, and delivered to your doorstep in a complete kit.

“we like to think of it as peace of mind in a box.”

#### Is FloJak Right For You?

If you have a 2" clearance in your well casing, and the static water level is 140 feet or less, then FloJak will probably work for you. Clearance may be determined by inserting a 2" O.D. pipe into your well. The depth to static water level is also easily determined by lowering a weighted string into the casing until you hear a splash. Mark the line with a knot, raise the string and measure the distance.

#### Which Pump Kit Will You Need?

Choose a FloJak pump kit that will extend 10-20 feet below static water level, and 10 feet above the bottom of your well.

Static	Pump Kit	Important Options
40'	Flojak F-50	MiniJak Lift Assist
40-90'	Flojak F-100	PowerJak Lift Assist
90-140'	Flojak F-150	PowerJak Lift Assist

Everyone knows that water is the most essential element on earth...

if you can get to it..

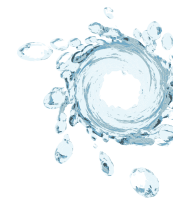

Three days without it and your body begins to shut down. When disaster strikes, water quickly vanishes from store shelves. You could make it for a short time on survival rations...about a gallon per day. A two-week survival-ration for a family of five is 70 gallons. No bathing, no watering, no clean clothes.

“what happens if you lose water for a month... or even longer?”

Life becomes much better if you have daily access to at least 10-15 gallons per person. For a family of five, that's 1,500 to 2,250 gallons per month.

Can you store that amount of water...?
